OSP Roundtable

Thursday, April 21, 2016

9:30 – 10:30 AM

Veterinary Research Tower – Lecture Hall 3 (LH3) ***

*** Note location

Speaker: Tammy Custer, GCO and Systems Specialist in OSP

Introduction to the new NIH ASSIST System

The National Institutes of Health (NIH) has developed a web-based system for use in preparing and submitting proposals. It is called the Application Submission System & Interface for Submission Tracking or ASSIST for short. This system can be used instead of Grants.gov for proposal submissions. One of the great features of ASSIST is its ability to check for eRA Commons errors and warnings before the proposal is submitted, eliminating the need for changed/corrected applications to be made via Grants.gov. You are also able to view the application, including attachments, as one PDF which is not possible prior to submission using Grants.gov.

To find out more about this system, join us for an overview of the system and how it works.

Feel free to send me your questions about the new NIH Assist system prior to the Roundtable session, so I can provide them to Tammy in advance of the Roundtable.

We look forward to seeing you April 21st!

Christine
