Plagiarism

Maurine Linder
January 25, 2016
Plagiarism: misrepresenting someone else’s creative work (e.g. words, methods, pictures, ideas, or data) as one’s own.

From Glossary of Commonly Used Terms in Research Ethics
D.B. Resnik, NIEHS, NIH, May 2015
Based on Shamoo AE and Resnik DB, Responsible Conduct of Research, 3rd ed. (New York: Oxford University Press, 2015)
Research Misconduct

Department of Health and Human Services

- Fabrication
- Falsification
- Plagiarism

Misrepresentation of another’s work as one’s own is a violation of the Cornell Code of Academic Integrity.
How Senator John Walsh Plagiarized a Final Paper

Senator John Walsh of Montana took most of a 2007 final paper required for his master's degree from the United States Army War College from other sources without proper attribution. Mr. Walsh copies an entire page nearly word-for-word from a Harvard paper, and each of his six conclusions is copied from a document from the Carnegie Endowment for International Peace without attribution.

Story by JONATHAN MARTIN. Graphic by JOSH KELLER, MATTHEW ERICSON, and NICK CORASANITI.

Example of plagiarism of words and ideas
Consequences

- Withdrew from the senate race in August 2014

- In October 2014, the War College rescinded Senator Walsh’s master’s degree
What did Senator Walsh do wrong?

- **Plagiarism of words**
  - “Throughout the paper Mr. Walsh cites the work of other authors in footnotes, but uses their exact – or almost exact – language without quotation marks.” NY Times

- **Plagiarism of ideas**
  - The six major conclusions of the paper were copied from another document without a citation, implying that the conclusions are original.

When writing about the work of others, cite the original source and paraphrase or use quotations marks.
In acknowledging the work of others, you demonstrate that you:

• Comprehend others’ ideas
• Respect other scholars, including peers
• Prove the value of your own original ideas
• Uphold the integrity of your own ideas as well as those of others, and in the context of funded research, the integrity of Cornell and the funding agency

Self-plagiarism

Definition: “reusing one’s own work without proper attribution or citation. Some people do not view self-plagiarism as plagiarism because it does not involve intellectual theft”.

Lehrer Apologizes for Recycling Work, While New Yorker Says It Won’t Happen Again

By JENNIFER SCHUESSLER  JUNE 20, 2012 4:03 PM  45 Comments

The science writer Jonah Lehrer, author of the runaway bestseller “Imagine: How Creativity Works,” has become the latest high-profile journalist to be caught up in a plagiarism scandal, with a counterintuitive twist that could come right out of his own books: The journalist he has been accused of borrowing from is himself.
Duplicate or redundant publication

- Publish the same intellectual material twice as original research
- Submit to two journals simultaneously
  - Violation of journal policies
- When is this acceptable?
  - Publish the same work in your thesis and in a journal
  - Primary data in an original research paper; reprint with permission and attribution in a review or methods paper
  - Grant applications - reuse of text and figures is acceptable when submitting to multiple agencies
  - Be aware of copyright
Duplicate or redundant publication

- Publish the same intellectual material twice as original research

  - Violation of journal policies
- When is this acceptable?
  - Publish the same work in your thesis and in a journal
  - Primary data in an original research paper; reprint with permission and attribution in a review or methods paper
  - Grant applications - reuse of text and figures is acceptable when submitting to multiple agencies
  - Be aware of copyright

Cases

- **LaCroix** - Reuse of sentences and a paragraph describing methods from prior publications in a review by the same authors
  - Questions about ethics of reusing one’s own text
  - Resolving an authorship issue

- **Dornfeld** – Plagiarism of ideas
  - Plan experiments based on data in a paper under review
  - Confidentiality of the review process; mentor-student relationship
Schedule and Logistics

- Small-group case study discussions
- Begin with the case that is face-up in your folders
  - LaCroix case - Self plagiarism; authorship
  - Dornfeld case – Plagiarism of ideas
- Each group will contribute a question for the panel – runners will collect the questions
- Reconvene for the panel discussion
- Final comments
- Lunch
