To the Cornell University community,

Please make note of these upcoming research funding opportunities from the National Science Foundation (NSF) Directorate for Social, Behavioral and Economic Sciences (SBE).

Developmental Sciences (DS)
Full Proposal Target Date: July 15, 2020
Program Guidelines: PD 08-1698
DS supports basic research that increases our understanding of cognitive, linguistic, social, cultural, and biological processes related to human development across the lifespan. Research supported by this program will add to our knowledge of the underlying developmental processes that support social, cognitive, and behavioral functioning, thereby illuminating ways for individuals to live productive lives as members of society. While there are no specific rules about budget limitations, a typical project funded through the DS program is approximately 3 years in duration with a total cost budget, including both direct and indirect costs, between $100,000 and $200,000 per year. More at https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=8671&WT.mc_id=USNSF_39&WT.mc_ev=click

Linguistics
Full Proposal Target Date: July 15, 2020
Program Guidelines: PD 98-1311
The Linguistics Program supports basic science in the domain of human language, encompassing investigations of the grammatical properties of individual human languages, and of natural language in general. Research areas include syntax, semantics, morphology, phonetics, and phonology. The program encourages projects that are interdisciplinary in methodological or theoretical perspective, and that address questions that cross disciplinary boundaries. More at https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5408&WT.mc_id=USNSF_39&WT.mc_ev=click

Linguistics Program - Doctoral Dissertation Research Improvement Grants (Ling-DDRI)
Full Proposal Target Date: July 15, 2020
Program Guidelines: NSF 20-538
The Linguistics Program supports basic science in the domain of human language, encompassing investigations of the grammatical properties of individual human languages, and of natural language in general. Research areas include syntax, linguistic semantics and pragmatics, morphology, phonetics, and phonology. The program encourages projects that are interdisciplinary in

methodological or theoretical perspective, and that address questions that cross disciplinary boundaries. More at https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=505033&WT.mc_id=USNSF_39&WT.mc_ev=click

Social Psychology
Full Proposal Target Date: July 15, 2020
Program Guidelines: PD 98-1332

The Social Psychology Program at NSF supports research and research infrastructure to advance basic knowledge in social psychology. Projects funded by the Social Psychology Program support the NSF mission to promote the progress of science; to advance the national health, prosperity, and welfare; and to secure the national defense. Proposals considered by the Social Psychology Program must communicate both the intellectual merit of the science and its broader societal impacts. Proposed research should carry strong potential for creating transformative advances in the basic understanding of human social behavior. Interdisciplinary, multidisciplinary and convergent research approaches are encouraged. More at https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5712&WT.mc_id=USNSF_39&WT.mc_ev=click
