UPCOMING EVENTS

The Census Project Virtual Briefing on the American Community Survey (ACS) Report
July 24th @ 1PM ET | The Census Project is hosting a virtual briefing regarding their latest comprehensive report on the ACS: “America’s Essential Economic and Social Data at Risk: A Vision to Preserve and Enhance the American Community Survey.”

Get to Know NSF GEO
July 25th @ 1PM ET | Join Directorate for Geosciences (GEO) staff remotely once a month for a new virtual conversational series to help connect the research and education community with program staff. Each office hour will be staffed by multiple GEO staff members and expert guests to discuss priority areas, scientific and educational programs, funding opportunities, and the NSF grants process.

NIH Transforming Discoveries into Products: Maximizing NIH’s Levers to Catalyze Technology Transfer Workshop
July 31st @ 9AM ET | NIH representatives will discuss policies and practices that shape biomedical innovation and promote access to NIH-funded discoveries; how NIH approaches the patenting and licensing of biomedical inventions; and its role in the broader biomedical research enterprise in promoting the application of knowledge to enhance human health.
If you intend to apply to a funding opportunity, please notify your College and/or Department research administrators or the Office of Sponsored Programs (OSP).

**NOAA Climate Program Office (CPO) NIHHIS Centers of Excellence**

**Letter of Intent due August 14, 2023** | In FY24, the National Integrated Heat Health Information System (NIHHIS) is offering funding opportunities to expand development of actionable, place-based climate information for community heat resilience. These competitions will support the new NIHHIS Centers of Excellence: (1) Center for Community Climate & Health Observations, Monitoring & Evaluation; (2) Center for Climate and Health Assessments, Policy, and Practice. The competitions will create virtual centers that will provide scientific support services to community-serving, community-based, and government entities working to address community climate and health issues (with a focus on heat and health).

**Cornell Atkinson Center Call for Research-to-Impact Fast Grant Proposals 2023**

**Multiple proposal due dates** | Fast Grants enable faculty to seize urgent and unique opportunities and provide up to $25,000 in support for impact-oriented climate research. In select cases, the amount awarded could be higher for proposals that make a compelling case for greater funding. Applications are open to any Cornell University-eligible PI, however Cornell PIs who were previously awarded 2030 Project Fast Grants are not eligible. There will be three distinct proposal calls in 2023; read the call for further details. Upcoming info session on July 24th – RSVP here.

**NSF 2024 Alan T. Waterman Award**

**Nominations due September 15, 2023** | The Alan T. Waterman is the National Science Foundation’s Highest Honor. The award recognizes an outstanding early career researcher in any field of science or engineering supported by the NSF. The awardee receives a medal and a grant of $1,000,000 to use over a five-year period for scientific research or advanced study in the mathematical, physical, biological, engineering, social, or other sciences at the institution of the recipient's choice.

**Einhorn Center Engaged Research Grant**

**Letter of Intent due September 18, 2023** | Ranging from $5,000 to $30,000, these grants are intended to increase and sustain undergraduate involvement in community-engaged research. Applicants with or without established community-engaged research or
scholarship experience in their field of study are eligible. A diversity of methods, practices, and disciplinary perspectives are welcomed. Faculty and staff researchers from schools and colleges not yet participating in the Engaged College Initiative are eligible. However, applicants from AAP, CHE, JCB, and ILR may apply if they are working in collaboration with individuals from another Cornell school or college.

**Good Food Institute Research (GFI) Grant Program**

**Proposals due September 21, 2023** | GFI seeks research project proposals in the fields of alternative protein development. Four key topic areas include (1) Extrusion 2.0: Enhancing traditional extrusion through process innovation and mechanistic evaluations of protein texturization; (2) Developing tools and knowledge to promote stemness and proliferation in seafood cell cultures; (3) Data collection and curation to inform the development of genome-scale metabolic models for optimization of feedstock formulation and feed conversion; and 4) Improving feedstock availability for food fermentation in biomass and precision fermentation platforms.

**Global Hubs Joint Research Seed Grants 2023**

**Applications due October 6, 2023** | Global Cornell is offering competitive faculty grants in collaboration with several Global Hubs partners. Apply for funding to explore potential research collaborations with colleagues at Hubs universities. Funded projects run from January 1–December 31, 2024. *Info sessions will be held in the fall – register now!*

**Simons Collaborations in Mathematics and the Physical Sciences (MPS)**

**Letter of Intent due November 1, 2023** | The aim of the Simons Collaborations in MPS program is to stimulate progress on fundamental scientific questions of major importance in mathematics, theoretical physics and theoretical computer science. The project should involve outstanding researchers in a range of career stages. Collaborations are budgeted for up to $2 million per year for an initial period of four years.

**Research Development** services are focused on proposal development support for proposal teams developing large-scale multi-disciplinary center grants, and training grants, as well as tenure-track faculty submitting to early career funding opportunities. The Research Development team also provides funder-specific workshops and trainings.
