FUNDING OPPORTUNITIES

If you intend to apply to a funding opportunity, please notify your College and/or Department research administrators or the Office of Sponsored Programs (OSP).

**NIH Blueprint MedTech Program: New funding opportunity for groundbreaking neurotechnologies**

*Pre-proposals due August 25, 2023* | Incubator hubs CIMIT’s CINTA and NeuroTech Harbor, through the NIH Blueprint MedTech program, are currently seeking proposals from academic and industry applicants who have emerging preventative, therapeutic, or diagnostic medical devices focused on disorders of the nervous system. A major emphasis of this program is to create opportunities for diverse innovators, including those who have been traditionally underrepresented in the neurotech space. Awards up to $500K to help support development toward commercialization. Register for an upcoming informational session or office hours here.

**Centre for Quantum Information and Quantum Control Bell Prize**

*Nominations due August 30, 2023* | The Bell Prize recognizes significant progress in quantum mechanics and its practical applications, whether it's experimental or theoretical research in fields such as quantum information theory, computation, foundations, cryptography, and control. The award is not a lifetime achievement award and focuses on
ongoing research.

National Centers for Biomedical Imaging and Bioengineering (NCBIB) (P41 Clinical Trials Optional)

Multiple deadlines (September 25, January 25, May 25) | This Notice of Funding Opportunity (NOFO) encourages grant applications for National Centers for Biomedical Imaging and Bioengineering (NCBIB). NCBIB are national resource centers for conducting research and development on new technologies that are driven by the needs of basic, translational, and/or clinical researchers. NCBIB also make their technologies available to other investigators, train members of the research community in the use of the technologies and disseminate the technologies broadly. Letters of Intent are due 8 weeks prior to the September 25, 2023, application due date and 12 weeks prior to all subsequent application due dates.

Dairy Management Inc. Sustainable Forage and Feed Production for Dairy Cattle

Proposals due October 13, 2023 | Dairy Management Inc. seeks innovative proposals to enhance the sustainability of feed and forage production. The proposed research should concentrate on the following priority areas: 1. Reducing greenhouse gas emissions, improving input efficiency, decreasing GHG emissions from land-applied manure, and/or other pertinent approaches to decarbonize dairy forage and feed production, as determined by the applicant or 2. Optimizing the water footprint of dairy feed production.

Research Development services are focused on proposal development support for proposal teams developing large-scale multi-disciplinary center grants, and training grants, as well as tenure-track faculty submitting to early career funding opportunities. The Research Development team also provides funder-specific workshops and trainings.
